

**THE ORIGINAL  
SPA**

## THE ORIGINAL HOT TUB

In 1972 California Cooperage® created the first mass-produced Redwood Hot Tubs for relaxation, romance and fun. First on the scene, these 'Original Hot Tubs' were the highlight in many Californians' gardens.

The Original California Cooperage® hot tubs in the garden redefined the meaning of relaxation and fun.

That very spirit lives on today in every California Cooperage® model. Designed for any garden, California Cooperage® hot tubs combine the mystique of the original redwood tub with the rejuvenating benefits of modern spa technology. The attractive and durable design is

classic in its simplicity - embracing the simple pleasures of hydrotherapy and fun.

California Cooperage® continues to evolve. Your new hot tub is destined to look good, feel good and last. From the cosy 102 to the family sized 281 with optional audio system - whichever model you choose, the original spirit of garden fun lives on.

The time has come to celebrate... the place where it all began.

## MODEL C102

The new model 102 corner spa is the latest addition to the California Cooperage range. It features 2 seats facing each other, relaxing massage jets and is very easy to install in a corner of your garden, terrace or even balcony.

## SUPERIOR CONTROL BY BALBOA WATERGROUP

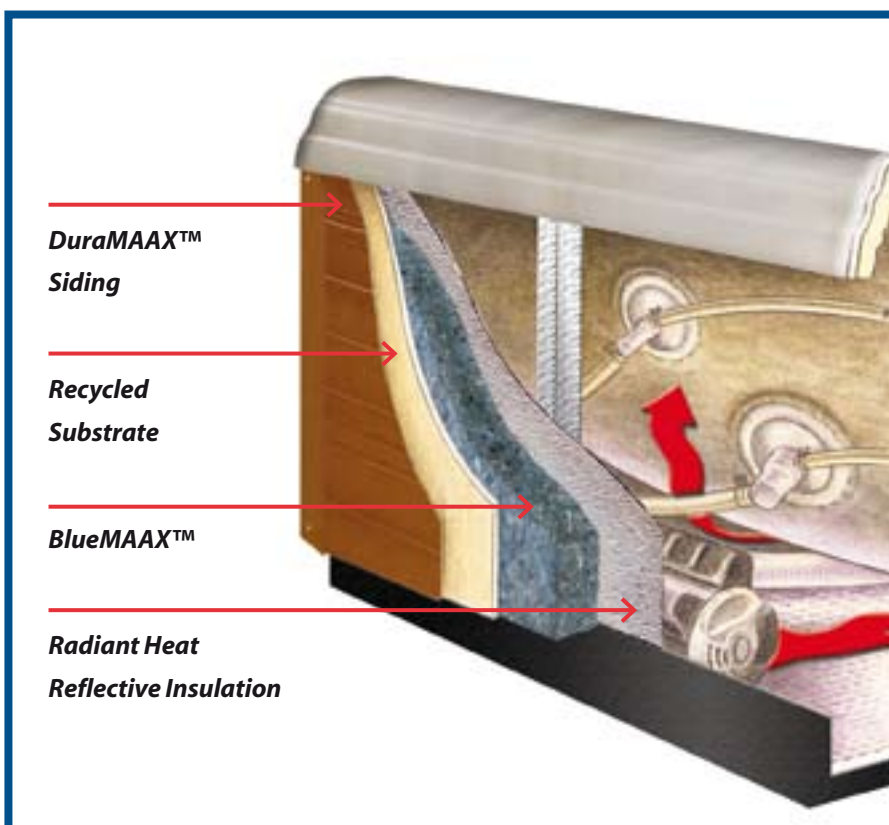

An advanced, state of the art spa controller provides the ultimate in ease of use, safety and reliability for every spa user. The **Powerworks™ with M7 technology** is a revolutionary new hardware/software platform that completely eliminates mechanical sensor switches and remote through-wall temperature sensors. The M7 platform features two identical solid state sensors that mount inside the heater manifold.

These “Smart Sensors” accurately and reliably measure water temperature while monitoring critical water conditions without the possibility of failure due to mechanical switch malfunction.

## FILTRATION

The water maintenance of your spa is made easy by the features of the California Cooperage®’s balanced filtration system. Water is drawn into the system from the upper skimmer and lower foot well areas. 100% of the hot tub’s water is filtered before reaching the **Powerworks™ 48 frame pump** as our high volume filter cycle cleans your spa water 4 to 6 times per hour.

## BLUEMAAX™

Exclusive to MAAX® Spas, BlueMAAX™ is incorporated into the insulation system, which surpasses the California Energy Commission’s standard by up to 20%. The insulation system utilizes eco-friendly BlueMAAX™ insulation made from recycled fibre approved by the U.S. Green Building Council. The insulation contains no chemical irritants, and is treated with a mineral based solution to prevent mould/mildew growth and pest infestation, and acts as a fire retardant. The new energy system also allows for easy service access, and can be taken out and put back together to factory specifications right in the field.

## MP3 SOUND SYSTEM

Featuring:

- External MP3 storage and interface
- Auto on/of
- Complete MP3 audio control
- High power subwoofer
- Flush mounted speaker system
